

Dinosaurs Are Cool

Lyrics and Music by Joe and Jack McLean

You've got your Stegosaurus pajamas.
Your Triceratops lunch box.
You wear your Allosaurus shoes
on top of your Spinosaurus socks.

If there's one thing you know it's Dinosaurs are cool
and you wish you could wear them all over you.

You know the T-Rex has little tiny arms.
The Brontosaurus are huge.
Pterodactyls aren't considered Dinosaurs
you want your teacher to explain why to you.

What needs no explanation is Dinosaurs are cool
and you wish you could learn more about them in school.

Refrain:

There's small ones, tall one, birdy ones, scaly ones,
ones with horns, one with teeth ones with claws.
Dinosaurs are the coolest.
There's armoured ones, feathered ones, herbivores and carnivores,
ones with beaks and ones with wings, they laid big eggs.
Dinosaurs are the coolest.

Dinosaurs went extinct about 65 million years ago.
That's older than your parents so it must be really old.
What never gets old is that Dinosaurs are cool.
Your parents on the other hand are going grey in front of you.

Jurassic park was a really fun movie.
Velociraptors are scary.
Dad says: "The CG really hold up despite it being made in '93".
You don't know what that means but you do know Dinosaurs are cool
and your Dad has to stop watching old movies with you.

Refrain
